## Report on review of condensed consolidated interim financial information

To the Board of Directors of  
Abu Dhabi Commercial Bank PJSC  
Abu Dhabi, UAE.

### Introduction

We have reviewed the accompanying condensed consolidated interim statement of financial position of Abu Dhabi Commercial Bank PJSC (the "Bank") and its subsidiaries (together referred to as the "Group") as at March 31, 2014 and the related condensed consolidated interim statements of income, comprehensive income, changes in equity and cash flows for the three month period then ended and accompanying notes. Management is responsible for the preparation and presentation of these condensed consolidated interim financial information in accordance with International Accounting Standard 34, "Interim Financial Reporting ("IAS 34)". Our responsibility is to express a conclusion on these condensed consolidated interim financial information based on our review.

### Scope of review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity." A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated interim financial information of the Group is not prepared, in all material respects, in accordance with IAS 34.

**Notes to the condensed consolidated interim financial information**

For the three month period ended March 31, 2014

**1. Activities and areas of operations**

Abu Dhabi Commercial Bank PJSC (“ADCB” or the “Bank”) is a public joint stock company with limited liability incorporated in the emirate of Abu Dhabi, United Arab Emirates (UAE). ADCB is principally engaged in the business of retail, commercial and Islamic banking and provision of other financial services through its network of fifty branches and three pay offices in the UAE, two branches in India, one offshore branch in Jersey and its subsidiaries and one representative office located in London.

The registered head office of the Bank is at Abu Dhabi Commercial Bank Head Office Building, Salam Street, Plot C- 33, Sector E-11, P. O. Box 939, Abu Dhabi, UAE

ADCB is registered as a public joint stock company in accordance with the UAE Federal Commercial Companies Law No. 8 of 1984 (as amended).

**2. Summary of significant accounting policies**

**2.1 Basis of preparation**

The condensed consolidated interim financial information has been prepared on a going concern basis and in accordance with IAS 34 - Interim Financial Reporting. It does not include all of the information required for full annual financial statements and should be read in conjunction with the consolidated financial statements of the Bank for the year ended December 31, 2013, which were prepared in accordance with International Financial Reporting Standards (IFRS) and International Financial Reporting Interpretation Committee (IFRIC) Interpretations.

The same accounting policies, presentation and methods of computation have been followed in these condensed consolidated interim financial information as were applied in the preparation and presentation of the Bank's consolidated financial statements for the year ended December 31, 2013. In March 2014, the Bank has deconsolidated its fund subsidiaries due to loss of control which is disclosed in Note 30.

For details of related party balances and transactions, refer to Note 35 in the consolidated financial statements for the year ended December 31, 2013. The related party balances and transactions for the quarter ended March 31, 2014 are similar in nature and magnitude. Note 8 of these condensed consolidated interim financial information provide details of lending exposure to Government entities.

The results for the three month period ended March 31, 2014 are not necessarily indicative of the results that may be expected for the financial year ending December 31, 2014.

The condensed consolidated interim financial information is prepared and presented in United Arab Emirates Dirhams (AED) which is the Bank's functional and presentation currency and are rounded off to the nearest thousand unless otherwise indicated.

As required by the Securities and Commodities Authority of the UAE (SCA) Notification No. 2624/2008 dated October 12, 2008, accounting policies relating to investment securities and investment properties have been disclosed in these condensed consolidated interim financial information.

The preparation of the condensed consolidated interim financial information in conformity with IFRSs requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

The main areas of judgments, estimates and assumptions applied in these condensed consolidated interim financial information, including the key sources of estimation uncertainty were the same as those applied in the Bank's consolidated financial statements for the year ended December 31, 2013.

**Notes to the condensed consolidated interim financial information**

For the three month period ended March 31, 2014

**2. Summary of significant accounting policies (continued)**

**2.2 Application of new and revised International Financial Reporting Standards (IFRSs)**

**2.2.1 New and revised IFRSs effective for accounting periods beginning January 1, 2014**

Amendments to IAS 32 - Financial Instruments require presentation to clarify certain aspects because of diversity in application of the requirements on offsetting, focused on four main areas:

- the meaning of 'currently has a legally enforceable right of set-off',
- the application of simultaneous realisation and settlement,
- the offsetting of collateral amounts and
- the unit of account for applying the offsetting requirements.

Amendments to IFRS 10 - Consolidated Financial Statements, IFRS 12 - Disclosure of Interests in Other Entities and IAS 27 - Separate Financial Statements relate only to investment entities, therefore will not apply to the Bank.

Amendment to IAS 36 - Impairment of Assets to reduce the circumstances in which the recoverable amount of assets or cash-generating units is required to be disclosed, clarify the disclosures required, and to introduce an explicit requirement to disclose the discount rate used in determining impairment (or reversals) where recoverable amount (based on fair value less costs of disposal) is determined using a present value technique.

Amendment to IAS 39 - Financial Instruments: Recognition and Measurement to make it clear that there is no need to discontinue hedge accounting if a hedging derivative is novated, provided certain criteria are met.

Other than the above, there are no other IFRSs that were effective for the first time for the financial year beginning January 1, 2014.

**2.2.2 Standards and Interpretations in issue not yet effective**

The Bank has not early adopted new and revised IFRSs that have been issued but are not yet effective.

	<b>Effective for annual periods beginning on or after</b>
<b>New Standards and amendments to Standards:</b>	<b>January 1, 2016</b>
IFRS 14 - Regulatory Deferral Accounts permits an entity which is a first-time adopter of International Financial Reporting Standards to continue to account, with some limited changes, for 'regulatory deferral account balances' in accordance with its previous GAAP, both on initial adoption of IFRS and in subsequent financial statements.	
IFRS 9 - Financial Instruments: Classification and Measurement (intended as complete replacement for IAS 39).	<b>January 1, 2018</b>

Key requirements of IFRS 9 are described as follows:

IFRS 9 requires all recognised financial assets that are within the scope of IAS 39 - Financial Instruments: Recognition and Measurement to be subsequently measured at amortised cost or fair value. Specifically, debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding, are generally measured at amortised cost at the end of subsequent accounting periods. All other debt investments and equity investments are measured at their fair values at the end of subsequent accounting periods.

Management anticipates that these IFRSs will be adopted in the condensed consolidated interim financial statements in the initial period when they become mandatorily effective. The Bank will assess IFRS 9's full impact once the standard is formally issued.

## **2. Summary of significant accounting policies (continued)**

### **2.3 Basis of consolidation**

The condensed consolidated interim financial information incorporates the financial statements of Abu Dhabi Commercial Bank PJSC and its subsidiaries (collectively referred to as “ADCB” or the “Bank”).

#### **Subsidiaries**

Subsidiaries are entities controlled by the Bank. The Bank controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the condensed consolidated interim financial information from the date that control commences until the date that control ceases.

#### **Special purpose entities**

Special Purpose Entities (SPEs) are entities that are created to accomplish a narrow and well-defined objective such as the securitisation of particular assets, or the execution of a specific borrowing or lending transaction. An SPE is consolidated if, based on an evaluation of the substance of its relationship with the Bank, the Bank’s power over the SPE, exposures or rights to variable returns from its involvement with the SPE and its ability to use its power over the SPE at inception and subsequently to affect the amount of its return, the Bank concludes that it controls the SPE.

The assessment of whether the Bank has control over an SPE is carried out at inception and normally no further reassessment of control is carried out in the absence of changes in the structure or terms of the SPE, or additional transactions between the Bank and the SPE except whenever there is a change in the substance of the relationship between the Bank and the SPE.

#### **Funds management**

The Bank manages and administers assets held in unit trusts on behalf of investors. The financial statements of these entities are not included in the condensed consolidated interim financial information except when the Bank controls the entity, as referred to above, or is the principal investor.

#### **Loss of control**

Upon the loss of control, the Bank derecognises the assets and liabilities of the subsidiary, any non-controlling interests and the other components of equity related to the subsidiary. Any surplus or deficit arising on the loss of control is recognised in profit or loss. If the Bank retains any interest in the previous subsidiary, then such interest is measured at fair value at the date that control is lost. Subsequently, it is accounted for as an equity-accounted investee or in accordance with the Bank’s accounting policy for financial instruments depending on the level of influence retained.

#### **Transactions eliminated on consolidation**

Intra-group balances, income and expenses (except for foreign currency transaction gains or losses) arising from intra-group transactions, are eliminated in preparing the condensed consolidated interim financial information. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

#### **Joint arrangements**

Joint arrangements are arrangements of which the Bank has joint control, established by contracts requiring unanimous consent for decisions about the activities that significantly affect the arrangements’ returns. They are classified and accounted for as follows:

## **2. Summary of significant accounting policies (continued)**

### **2.3 Basis of consolidation (continued)**

#### **Joint arrangements (continued)**

Joint operation – when the Bank has rights to the assets and obligations for the liabilities, relating to an arrangement, it accounts for each of its assets, liabilities and transactions, including its share of those held or incurred jointly, in relation to the joint operation.

Joint venture – when the Bank has rights only to the net assets of the arrangements, it accounts for its interest using the equity method, as for associates.

### **2.4 Investment securities**

Investment securities are initially measured at fair value plus, in the case of investment securities not at fair value through profit or loss, incremental direct transaction costs, and subsequently accounted for depending on their classification as either held-to-maturity, fair value through profit or loss or available-for-sale.

Investment securities are classified into the following categories depending on the nature and purpose of the investment:

- Investments at fair value through profit or loss;
- Held-to-maturity investments and
- Available-for-sale.

#### **Investments at fair value through profit or loss (FVTPL)**

Investment securities are classified as at FVTPL when either held for trading or when designated as at FVTPL.

Investment securities are classified as held for trading if:

- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Bank manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

Investment securities other than held for trading may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise for measuring such securities on a different basis; or
- it forms part of a group of financial assets, which is managed and its performance is evaluated on a fair value basis, in accordance with the Bank's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and IAS 39-Financial Instruments: Recognition and Measurement permits the entire combined contract (asset or liability) to be designated as at FVTPL.

Investment securities at FVTPL are stated at fair value, with any gains or losses arising on re-measurement recognised in the condensed consolidated interim income statement.

#### **Held-to-maturity**

Investments which have fixed or determinable payments with fixed maturities which the Bank has the positive intention and ability to hold to maturity are classified as held-to-maturity investments.

**2. Summary of significant accounting policies** (continued)

**2.4 Investment securities** (continued)

**Held-to-maturity** (continued)

Held-to-maturity investments are initially recognised at fair value plus any directly attributable transaction costs and are subsequently measured at amortised cost using the effective interest rate method, less any impairment losses, with revenue recognised on an effective yield basis.

Amortised cost is calculated by taking into account any discount or premium on acquisition using an effective interest rate method.

If there is objective evidence that an impairment on held-to-maturity investments carried at amortised cost has been incurred, the amount of impairment loss recognised in the condensed consolidated interim income statement is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the investments' original effective interest rate.

Investments classified as held-to-maturity and not close to their maturity, cannot ordinarily be sold or reclassified without impacting the Bank's ability to use this classification and cannot be designated as a hedged item with respect to interest rate or prepayment risk, reflecting the longer-term nature of these investments.

**Available-for-sale**

Investments not classified as either "fair value through profit or loss" or "held-to-maturity" are classified as "available-for-sale". Available-for-sale assets are intended to be held for an indefinite period of time and may be sold in response to liquidity requirements or changes in interest rates, commodity prices or equity prices.

Available-for-sale investments are initially recognised at fair value plus any directly attributable transaction costs and are subsequently measured at fair value. The fair values of quoted financial assets in active markets are based on current prices. If the market for a financial asset is not active, and for unquoted securities, the Bank establishes fair value by using valuation techniques (e.g. recent arms length transactions, discounted cash flow analysis and other valuation techniques). Only in very rare cases where fair value cannot be measured reliably, investments are carried at cost and tested for impairment, if any.

Gains and losses arising from changes in fair value are recognised in the condensed consolidated interim statement of comprehensive income and recorded in cumulative changes in fair value with the exception of impairment losses, interest calculated using the effective interest method and foreign exchange gains and losses on monetary assets, which are recognised directly in the condensed consolidated interim income statement. Where the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously recognised in equity in the cumulative changes in fair value is included in the condensed consolidated interim income statement for the period.

If an available-for-sale investment is impaired, the difference between the acquisition cost (net of any principal repayments and amortisation) and the current fair value, less any previous impairment loss recognised in the condensed consolidated interim income statement is removed from equity and recognised in the condensed consolidated interim income statement.

Once an impairment loss has been recognised on an available-for-sale financial asset, the subsequent accounting treatment for changes in the fair value of that asset differs depending on the nature of the available-for-sale financial asset concerned:

**2. Summary of significant accounting policies** (continued)

**2.4 Investment securities** (continued)

**Available-for-sale** (continued)

- For an available-for-sale debt security, a subsequent decline in the fair value of the instrument is recognised in the condensed consolidated interim income statement when there is further objective evidence of impairment as a result of further decreases in the estimated future cash flows of the financial asset. Where there is no further objective evidence of impairment, the decline in the fair value of the financial asset is recognised directly in equity. If the fair value of a debt security increases in a subsequent period, and the increase can be objectively related to an event occurring after the impairment loss was recognised in the condensed consolidated interim income statement, the impairment loss is reversed through the condensed consolidated interim income statement to the extent of the increase in fair value.
- For an available-for-sale equity security, all subsequent increases in the fair value of the instrument are treated as a revaluation and are recognised in other comprehensive income, accumulating in equity. A subsequent decline in the fair value of the instrument is recognised in the condensed consolidated interim income statement, to the extent that further cumulative impairment losses have been incurred in relation to the acquisition cost of the equity security. Impairment losses recognised on the equity security are not reversed through the condensed consolidated interim income statement.

**2.5 Investment properties**

Investment property is property held either to earn rental income or for capital appreciation or both, but not for sale in the ordinary course of business, use in the production or supply of goods or services or for administrative purposes. Investment property is reflected at valuation based on fair value at the statement of financial position date. The fair value is determined on a periodic basis by independent professional valuers.

Investment property under development that is being constructed or developed for future use as investment property is measured initially at cost including all direct costs attributable to the design and construction of the property including related staff costs. Subsequent to initial recognition, investment properties under development are measured at fair value.

Gains and losses arising from changes in the fair value of investment properties are included in the condensed consolidated interim income statement in the period in which they arise.

Loans and advances include a loan to the Government of Abu Dhabi ("Government") of AED 425,898 thousand (December 31, 2013 – AED 436,008 thousand). This loan arose as a result of the Government acquiring certain non-performing loans in previous years against which the Bank was indemnified by the Government through a guarantee. The Bank has an equivalent amount of long term deposit against this loan (Note 12).

Valuations are carried out by registered independent valuers having an appropriate recognised professional qualification and recent experience in the location and category of the property being valued. The properties were valued during the last quarter of the year 2013.

The valuation methodologies considered by external valuers include:

- Direct Comparable method: This method seeks to determine the value of the property from transactions of comparable properties in the vicinity applying adjustments to reflect differences to the subject property.
- Investment method: This method is used to assess the value of the property by capitalising the net operating income of the property at an appropriate yield an investor would expect for an investment of the duration of the interest being valued.

All investment properties of the Bank are located within the UAE.

**18. Capital notes**

In February 2009, the Department of Finance, Government of Abu Dhabi subscribed to ADCB's Tier I regulatory capital notes with a principal amount of AED 4,000,000 thousand (the "Notes").

The Notes are non-voting, non-cumulative perpetual securities for which there is no fixed redemption date. Redemption is only at the option of the Bank. The Notes are direct, unsecured, subordinated obligations of the Bank and rank pari passu without any preference among themselves and the rights and claims of the Note holders will be subordinated to the claims of Senior Creditors. The Notes bear interest at the rate of 6% per annum payable semi-annually until February 2014, and a floating interest rate of 6 month EIBOR plus 2.3% per annum thereafter. However, the Bank may at its sole discretion elect not to make a coupon payment. The Note holders do not have a right to claim the coupon and an election by the Bank not to service the coupon is not considered an event of default. In addition, there are certain circumstances under which the Bank is prohibited from making a coupon payment on a relevant coupon payment date (Non-Payment Event).

If the Bank makes a non-payment election or a non-payment event occurs, then the Bank will not (a) declare or pay any distribution or dividend or (b) redeem, purchase, cancel, reduce or otherwise acquire any of the share capital or any securities of the Bank ranking pari passu with or junior to the Notes except securities, the term of which stipulate a mandatory redemption or conversion into equity, in each case unless or until two consecutive coupon payments have been paid in full.

**26. Earnings per share (unaudited)**

**Basic and diluted earnings per share**

The calculation of basic earnings per share is based on the net profit attributable to equity holders of the Bank and the weighted average number of equity shares outstanding. Diluted earnings per share is calculated by adjusting the weighted average number of equity shares outstanding for the dilutive effects of potential equity shares held on account of employees' incentive plan and treasury shares arising on consolidation of fund subsidiaries.

**28. Operating segments**

The Bank has four reportable segments, as described below, which are the Bank's strategic divisions. The strategic divisions offer different products and services and are managed separately based on the Bank's management and internal reporting structure. For each of the strategic divisions, the Bank's Performance Management Committee reviews internal management reports on at least a quarterly basis.

The following summary describes the operations in each of the Bank's reportable segments

Consumer banking - comprises of retail, wealth management and Islamic financing. It includes loans, deposits and other transactions and balances with retail customers and corporate and private accounts of high net worth individuals and funds management activities.

**28. Operating segments (continued)**

Wholesale banking - comprises of business banking, cash management, trade finance, corporate finance, small and medium enterprise financing, investment banking, Indian operations, Islamic financing, infrastructure and asset finance, government and public enterprises. It includes loans, deposits and other transactions and balances with corporate customers.

Investments and treasury - comprises of central treasury operations, management of the Bank's investment portfolio and interest rate, currency and commodity derivative portfolio and Islamic financing.

Investments and treasury undertakes the Bank's funding and centralized risk management activities through borrowings, issue of debt securities and use of derivatives for risk management. It also undertakes trading and corporate finance activities and investing in liquid assets such as short-term placements, corporate and government debt securities.

Property management - comprises of real estate management and engineering service operations of subsidiaries - Abu Dhabi Commercial Properties LLC, Abu Dhabi Commercial Engineering Services LLC, and rental income of ADCB.

Information regarding the results of each reportable segment is included below. Performance is measured based on segment profit before income tax, as included in the internal management reports that are reviewed by the Performance Management Committee. Segment profit is used to measure performance as management believes that such information is the most relevant in evaluating the results of certain segments relative to other entities that operate within these industries. Inter-segment pricing is determined on an arm's length basis.

**30. Disposal of fund subsidiaries (unaudited)**

On March 31, 2014, the Bank redeemed substantial units in Al Nokhitha Investments Feeder Fund, MSCI UAE Index Feeder Fund and Arabian Index Feeder Fund which resulted in reduction of its indirect stake in Al Nokhitha Fund, ADCB MSCI UAE Index Fund and ADCB Arabian Index Fund (the "Funds") and consequently its exposure to variable returns from its involvement in these Funds reduced considerably to a level that led the Bank to conclude that there is a loss of control over these subsidiaries. The residual interest in these funds is classified as available-for-sale investments as per IAS 39.

**Analysis of net assets over which control was lost:**

	AED'000
Bank balances	226,121
Trading securities	867,792
Other assets	11,888
<b>Total assets</b>	<b>1,105,801</b>

<b>Total sales consideration</b>	<b>265,088</b>
<b>Less: Fair value of net assets over which control was lost</b>	<b>265,088</b>
<b>Gain on disposal of fund subsidiaries</b>	<b>-</b>

**Net cash inflow on disposal of fund subsidiaries**

	AED'000
Consideration received in cash and cash equivalents	95,112

Fair value of residual interest has been booked as transfer to available-for-sale investments and this being a non-cash transaction has not been reflected in the condensed consolidated interim statement of cash flows.

Net gains amounting to AED 91,521 thousand on treasury shares held by fund subsidiaries pertaining to previous periods have now been recognised.

### **31. Fair value hierarchy**

The fair value measurements are categorised into different levels in the fair value hierarchy based on the inputs to valuation techniques used. The different levels are defined as follows:

#### **Quoted market prices – Level 1**

Financial instruments are classified as Level 1 if their values are observable in an active market. Such instruments are valued by reference to unadjusted quoted prices for identical assets or liabilities in active markets where the quoted price is readily available, and the price represents actual and regularly occurring market transactions.

#### **Valuation techniques using observable inputs – Level 2**

Financial instruments and investment properties classified as Level 2 have been valued using models whose inputs are observable in an active market. Valuation based on observable inputs include financial instruments such as swaps and forwards which are valued using market standard pricing techniques and options that are commonly traded in markets where all the inputs to the market standard pricing models are observable.

The category includes derivative financial instruments as certain OTC derivatives, commodity derivatives, foreign exchange spot and forward contracts and non derivative financial instruments such as investment properties.

These instruments are valued using the inputs observable in an active market. Valuation of the derivative financial instruments is made through discounted cash flow method using the applicable yield curve for the duration of the instruments for non optional derivatives and standard option pricing models such as Black-Scholes and other valuation models for optional derivatives.

Level 2 investment properties include buildings completed and under development. Refer Note 9 in respect of the valuation techniques used.

#### **Valuation techniques using significant unobservable inputs – Level 3**

Financial instruments are classified as Level 3 if their valuation incorporates significant inputs that are not based on observable market data (unobservable inputs). A valuation input is considered observable if it can be directly observed from transactions in an active market.

Unobservable input levels are generally determined based on observable inputs of a similar nature, historical observations or other analytical techniques.

This category mainly includes private equity instruments and private funds. The carrying values of these investments are adjusted as follows:

- a) Private equity instruments – using the latest available net book value; and
- b) Private funds – based on the net asset value provided by the fund manager.

#### **Other assets and liabilities not measured at fair value**

The majority of the Bank's assets and liabilities measured at amortised cost, including loans and advances and deposits from customers, are Level 3 assets and liabilities, as there is no active market for such assets and liabilities. The Bank considers these to have a fair value approximately equivalent to their net carrying value, based on discounted cash flow calculations performed for a sample of loans, the majority of which carry variable interest rates, and given the relatively short tenor of most deposits from customers.

**Notes to the condensed consolidated interim financial information**

For the three month period ended March 31, 2014

**31. Fair value hierarchy (continued)**

This hierarchy requires the use of observable market data when available. The Bank considers relevant and observable market prices in its valuations where possible. The table below analyses recurring fair value measurements for assets and liabilities.

<b>Balance at</b>	<b>325,595</b>	316,588

There were no significant transfer between Level 1 and Level 2 during the period.

There is no change in valuation techniques during the period.

**32. Legal proceedings**

The Bank is involved in various legal proceedings and claims arising in the ordinary course of business. While the outcome of these matters cannot be predicted with certainty, management does not believe that these matters will have a material adverse effect on the Bank's condensed consolidated interim financial information if disposed unfavourably.
